### **DETAILED ACTION**

Applicants' arguments; filed 4/16/04, 7/22/04, and 11/22/04; have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

### **VAGUENESS AND INDEFINITENESS**

Claims 2-5, 8-14, 17, 49-52, and 55-57 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In instant claim 8, lines 3-5, a deposition apparatus is cited as being operated according to a target pattern and provides probes on the substrate in a target array pattern. Then, confusingly, an actual pattern is cited in part (a) which is cited as separate from the target pattern but the target pattern is cited as being what is made by the deposition apparatus. This conflicting wording causes claims 8, 10, 17, 49-52, 56, and those dependent therefrom to be vague and indefinite. Clarification via clearer claim wording is requested.

### **PRIOR ART**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1631

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2, 3, 10, 13, 14, 17, 56, and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baldeschwieler et al. (P/N 6,015,880); taken in view of Weber et al. (P/N 4,328,504).

This rejection is set forth with the substitution of Baldeschwieler et al. for Southern previously in that Baldeschwieler et al. discloses multiple nozzle deposition. Applicants argued this rejection with Southern in that discrepancies that are corrected for are not appreciated in the combination of reference as making an array prepared and corrected to make it usable whereas the uncorrected array is not usable. This argument is non-persuasive because the instant claims are not limited as to the correction resulting in usability vs. uncorrected not being usable. Therefore, this argument is not directed to the facts of the instant claims and thus non-persuasive.

#### **OBVIOUSNESS DOUBLE-PATENTING REJECTION**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1631

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2, 3, 8, 10, 13, 14, and 50 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 5-12, 25, 29-31, 39-43, and 46 of copending Application No. 09/302,898. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are directed to embodiments wherein target vs. actual deposition patterns are compared wherein correction is applied in order to obtain a corrected spot pattern for array fabrication as in claim 46 of said copending application which describes this specie of the invention which is common between these claim sets.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

No claim is allowed.
